

Be a sponsor of The Movement Centre's Move 'N Groove-a-Thon 2018

An all-abilities 5 hour dance relay on October 13th at the University of Manitoba
Noon - 5 PM, supporting **Conductive Education Rehabilitation at The Movement Centre**

Effective for Individuals with:

- ✦ Cerebral Palsy
- ✦ Multiple Sclerosis
- ✦ Acquired Brain Injury
- ✦ Parkinson's Disease
- ✦ Child Stroke Recovery
- ✦ Adult Stroke Recovery

What a smile! This little girl has been coming to The Movement Centre of Manitoba for only 8 months, but in that time, she's achieved so many milestones!

Just before she started her Conductive Education rehabilitation sessions, her parents noticed she showed a heightened interest in moving. To capitalize on her interest, she was enrolled in her first session at The Movement Centre, and within 3 weeks, the change was monumental! Her parents didn't quite know what to expect from "Conductive Education rehabilitation" so originally their only goal was to increase her mobility. They quickly realized that she would be improving more than just her mobility – she would be gaining independence! Her core strength has improved, her weaker hand has strengthened, and she's gone from barely crawling to walking assisted in a walker. And she's making progress eating independently and being potty trained – things her parents did not expect!

As for her future goals, every day brings her closer to walking independently! Until then, she's happy and proud of each and every achievement, and we celebrate them with her and her family!
